SUMMARY

Computer Engineering graduate with experience in IT Support, ERP System Development, Business Analysis, and Information System Development. Experienced in gathering and analyzing user requirements, understanding business processes, coordinating between users and development teams, and supporting system implementation and improvement. Hands-on experience in developing and supporting ERP systems, RPA automation, WMS dashboards, IT Asset Management systems, chatbots and automation workflows, as well as supporting the delivery and implementation of projects for government organizations. Also experienced in AI, Computer Vision, IoT, and Data-related projects, including an academic project on Intelligent Parking Management using AI. Interested in applying technology to solve business problems and continuously improving skills in Business Analysis, Data, AI, and Digital Transformation.

PROFESSIONAL EXPERIENCE

ERP / Information System Development, AMPOL FOOD PROCESSING LIMITED Nov 2025 - Apr 2026

- Develop, enhance, and maintain internal enterprise information systems to support business requirements and operational processes.
- Gather and analyze user requirements and translate business needs into practical system solutions.
- Coordinate with users, developers, and relevant stakeholders to clarify requirements and resolve system issues.
- Analyze existing business processes and identify opportunities for system and process improvement.
- Provide technical consultation and user support across departments.
- Develop RPA solutions to automate stock data extraction for the Purchasing Department.
- Design and implement an IT Asset Management System to support asset tracking and management.
- Develop WMS dashboards for warehouse monitoring and data analysis.
- Develop chatbots and automation workflows using n8n to support internal operations.
- Develop and support a DC Audit monitoring system.
- Support data analysis, data development, and business process automation initiatives.

IT Support (Business Operations), BEDROCK ANALYTICS COMPANY LIMITED Apr 2026 - Aug 2026 Contact 4 Month

- Analyzed and resolved post-implementation system issues by gathering user feedback, identifying root causes, and recommending practical system improvements.
- Gathered and translated business requirements into actionable system enhancement requests, ensuring solutions aligned with user needs and project constraints.
- Collaborated with development teams, business users, and stakeholders to improve system functionality and support successful system implementation.
- Coordinated communication between executives, managers, end users, and developers to ensure a clear understanding of business requirements and technical solutions.
- Supported and enhanced multiple municipal information systems, including Utility Billing Systems, Government Service Request Systems, Meter Reading Systems, City Data Platform (CDDP), Incident Management Systems, and Smart Meter solutions.
- Worked closely with public-sector users through on-site support, gaining practical experience in analyzing operational challenges and delivering user-focused system improvements.

TECHNICAL SKILLS

Business & System

- Business Analysis
- Requirement Gathering
- Business Process Analysis
- System Analysis
- ERP Systems
- System Implementation
- User Support
- Process Improvement

AI / Automation

- Artificial Intelligence
- Machine Learning
- Computer Vision
- TensorFlow
- RPA
- n8n
- Chatbot

Programming & Data

- Python
- SQL
- JavaScript
- C++
- MySQL
- Database
- REST API
- JSON

IoT & Systems

- IoT
- Raspberry Pi
- Sensor Integration
- WebSocket
- Linux

Tools

- Microsoft Excel
- Microsoft Word
- Microsoft PowerPoint
- Git / GitHub
- Visual Studio Code
- Antigravity,Kiro,,Docker
- NotebookLM,Claude,Chat GPT
- N8N
- Figma

EDUCATION

Bachelor of Engineering in Computer Engineering

Southeast Asia University

GPA: 3.35 / 4.00

Second Class Honors

CORE STRENGTHS

- Analytical Thinking
- Problem Solving
- Requirement Analysis
- Communication
- Cross-functional Collaboration
- Fast Learning
- Adaptability
- Technical & Business Understanding
- User-oriented Problem Solving

ADDITIONAL INFORMATION

Languages: Thai,English

Certifications: ITPEC Information Technology Passport Examination (IP) Passed: March 8, 2024
